Investment policy

The pension product, BVG-Mix 25 Plus, makes broadly diversified investments in the global financial markets. The focus, however, is on investments in Swiss equities, property and bonds. With a strategic equity allocation of 25 % and a tactical range of 15 % to 35 %, the product has a balanced focus. The investments are selected in compliance with the investment guidelines of the Ordinance on Occupational Retirement, Survivors' and Disability Pension Plans (BVV2). Depending on the prevailing economic situation as well as the assessment of the interest rate, equity market and exchange rate environments, controlled deviations from the investment strategy are undertaken within the permitted ranges.
