

BVG-Mix Dynamic Allocation 0-40

Tranche I

30.09.2020

Investment policy

The investment vehicle BVG-Mix Dynamic Allocation makes broadly diversified investments in the global financial markets. The focus, however, is on investments in Swiss equities, real estate and bonds. The investment vehicle BVG-Mix Dynamic Allocation pursues a dynamic investment strategy and therefore does not have a static asset allocation. The equity quota varies from 0 to max. 40%. If the investments suffer losses, the risk assets are reduced in order to minimise further falls in prices, while positions aimed at the preservation of capital are increased. This prevents the fund assets from incurring larger losses. It also enables gains to be made from above-average price rises during periods of long-term rising equity markets. Investment positions aimed at the preservation of capital include, in particular, investments in fixed-income securities with comparatively low value fluctuations and liquid funds. Risk assets include investments in equity funds, real estate and other securities with large earning potential and more pronounced value fluctuations. The investments are selected in compliance with the investment guidelines of the Ordinance on Occupational Retirement, Survivors' and Disability Pension Plans (BW2).

Responsible Investment Policy

The fund is subject to the responsible investment (RI) policy in line with the requirements imposed by the Baloise Group. The RI policy can be accessed at the following link:

<https://www.baloise-asset-management.com/en/ch/about-us/responsible-investment.html>

This fund is a «Classic Responsible» fund, i.e. compliance with the Baloise RI policy is only guaranteed to a certain degree. The scope of the Baloise RI policy does not include any third-party, passive or white label products. Funds for which we can guarantee that 100% of the investments made comply with the Baloise RI policy are referred to as «Pure Responsible» funds.
